

PPB 70-1754

20 AUG 1970

MEMORANDUM FOR: Directorate Information Processing Coordinators

SUBJECT

: ADP MIS

File: PPB to SSJ

1. Attached are two copies of current printouts of the ADP MIS data base for your Directorate:

- a. Equipment Inventory
- b. Computer Utilization
- c. Manpower and Cost Summary
- d. Computer Acquisition History

2. We did not produce a separate listing of the projected equipment gains which you reported as of 30 June 1970. Instead, those projected items and also items released during the preceding year are listed along with the on-hand items for each computer system. The installation and release dates printed serve to distinguish items on hand from those released or planned for future installation.

3. We now have some proposed revisions to the ADP MIS aimed at the elimination of redundant reporting and improvement of other elements of the ADP MIS which I believe are worth retaining. Hopefully, these revisions can be given further consideration and implemented within the next few months.

*H 3 refers to rewrite of MIS instruction
in process for sometime*

Chairman, Information Processing Board
